

DRIFT Dispersion Model Reports and Papers – May 2020

Mathematical Model Description

1. Tickle G A (2015) “DRIFT Version 3.7.2: Mathematical Model Description”, ESR Technology Report ESR/UC000417/001/Issue 3, Oct 2015
2. Tickle G A and Carlisle J E (2008) “Extension of the dense dispersion model DRIFT to include buoyant lift-off and buoyant rise”, HSE Research Report, RR629, <https://www.hse.gov.uk/research/rrpdf/rr629.pdf>
3. Kukkonen J et al (1994) “The homogeneous equilibrium approximation in models of aerosol cloud dispersion”, Atmos. Environ. Vol. 28, Issue 17, pp 2763-2776, [https://doi.org/10.1016/1352-2310\(94\)00123-5](https://doi.org/10.1016/1352-2310(94)00123-5)
4. Duijm N J and Webber D M (1994) “Dispersion in the presence of buildings”, J. Loss Prev. Proc. Ind., Vol. 7, pp 118-123, [https://doi.org/10.1016/0950-4230\(94\)80027-8](https://doi.org/10.1016/0950-4230(94)80027-8)
5. Webber D M et al (1994) “Hydrogen fluoride source terms and dispersion”, J. Loss Prev in Proc. Ind, Vol. 7, pp 94-105, [https://doi.org/10.1016/0950-4230\(94\)80025-1](https://doi.org/10.1016/0950-4230(94)80025-1)
6. Jones S J and Webber D M (1993) “The interactions of a dense gas plume with a fence”, Transactions of the IChemE, Vol. 71B, pp 15-20, <http://archive.icheme.org/cgi-bin/somscid.cgi?page=html/volumes/71b>
7. Webber, D M et al (1994) “Complex Features in Dense Gas Dispersion Modelling”, AEA Technology Report, AEA/CS/FLADIS/1994 Issue 1.
8. Webber D M and Wren T (1993) “A differential phase equilibrium model for clouds, plumes and jets”, SRD Report SRD/HSE R552
9. Webber et al (1992) “A model of a dispersing dense gas cloud and the computer implementation DRIFT. I. Near-instantaneous releases”, SRD Report SRD/HSE R586, April 1992
10. Webber et al (1992) “A model of a dispersing dense gas cloud and the computer implementation DRIFT. II. Steady continuous releases”, SRD Report SRD/HSE R587, April 1992
11. Brighton P W M et al (1992) “The effects of natural and man-made obstacles on heavy gas dispersion – Summary of Report”, SRD Report SRD/HSE R583
12. Brighton P W M et al (1992) “The effects of natural and man-made obstacles on heavy gas dispersion –Part I: Review of earlier data”, SRD Report SRD/HSE R581
13. Brighton P W M et al (1992) “The effects of natural and man-made obstacles on heavy gas dispersion –Part II: Dense gas dispersion over complex terrain”, SRD Report SRD/HSE R582
14. Byrne A et al (1992) “Description of ambient atmospheric conditions for the computer code DRIFT”, SRD Report SRD/HSE R553, May 1992
15. Wheatley C J (1988) “Dispersion of a passive puff released at the ground into the diabatic atmospheric boundary layer”, SRD Report SRD/HSE R445

Model Verification and Validation

16. Chaplin Z et al (2017) “Modelling flammable chemical major hazards using the DRIFT 3 dispersion model”, IChemE Symposium Series No. 162, Hazards 27, <https://www.icheme.org/media/11898/poster-02.pdf>
17. Coldrick S and Webber D (2017) “Evaluation of the DRIFT gas dispersion model version 3.6.4”, HSE Research Report, RR1100, <https://www.hse.gov.uk/research/rrpdf/rr1100.pdf>
18. Cruse H, et al (2016) “Gas dispersion modelling using the DRIFT 3 model to assess toxic and flammable chemical major hazards”, IChemE Symposium Series No. 161, Hazards 26, <https://www.icheme.org/media/11764/hazards-26-paper-27-gas-and-vapour-dispersion-modelling-using-the-drift-3-model-to-assess-the-safety-from-toxic-and-flammable-chemical-major-hazards.pdf>
19. Coldrick S (2016) “Modelling small-scale flashing propane jets”, Chemical Engineering Transactions Vol 48, pp 73-78, <https://www.cetjournal.it/index.php/cet/issue/view/vol48>
20. Tickle G A (2014) “Comparison of predictions from the gas dispersion model DRIFT (Version 3) against URAHFREP data”, IChemE Symposium Series No. 159, Hazards 24, <https://www.icheme.org/media/8956/xxiv-paper-61.pdf>
21. Tickle G A et al (2012) “Comparison of predictions from the gas dispersion model DRIFT (Version 3) against URAHFREP data”, ESR Technology Report ESR/D1000976/Issue 4, 29 June 2012
22. Tickle G A (2012) “Comparison of DRIFT Version 3 Predictions with DRIFT2 and Experimental Data”, ESR Technology Report, ESR/D1000846/STR01/Issue 3, 25 June 2012
23. Tickle G A (2001) “Model predictions compared with URAHFREP Campaign 2 field trial data”, AEA Technology Report, AEAT/NOIL/27328006/003(R) Issue 2
24. Webber, D M et al (1994) “Complex Features in Dense Gas Dispersion Modelling”, AEA Technology Report, AEA/CS/FLADIS/1994 Issue 1.
25. Brighton P W M et al (1994) “Comparison of heavy gas dispersion models for instantaneous releases”, J. Haz. Mat, Vol. 36, pp 193-208, [https://doi.org/10.1016/0304-3894\(94\)85015-1](https://doi.org/10.1016/0304-3894(94)85015-1)
26. Jones S J et al (1993) “Initial verification and validation of DRIFT”, SRD Report SRD/HSE R580, Oct 1993

Jack Rabbit II Chlorine Field Trial Comparisons

27. Gant S et al (2019) “DRIFT Dispersion Model Predictions for the Jack Rabbit II Model Inter-Comparison Exercise”, Bruges, Belgium, 3-6 June 2019, http://www.harmo.org/Conferences/Proceedings/Bruges/publishedSections/PPT/H19-003_Gant.pdf
28. Gant S et al (2018) “Dense gas dispersion model development and testing for the Jack Rabbit II phase 1 chlorine release experiments”, Atmos. Environ. Vol. 192 (2018) pp 218-240, <https://doi.org/10.1016/j.atmosenv.2018.08.009>

29. Gant S et al (2018) “DRIFT Results for the Jack Rabbit II Coordinated Model Inter-Comparison Exercise”, 22nd Annual George Mason University (GMU) Conference on Atmospheric Transport and Dispersion Modeling, Fairfax, Virginia, USA, 19-21 June 2018
30. McKenna B et al (2017) “Jack Rabbit II 2015 Chlorine Release Experiments: Simulation of Trails using DRIFT and PHAST”, 18th conference on “Harmonisation within Atmospheric Dispersion Modelling for Regulatory Purpose”, Bologna, Italy, 9-12 Oct 2017
31. McKenna B et al (2017) “Jack Rabbit II 2015 trials: preliminary comparison of experimental results against Drift and Phast dispersion model predictions”, IChemE Symposium Series No. 162, Hazards 27, <https://www.icheme.org/media/11891/paper-04.pdf>
32. Gant S et al (2017) “Dispersion model predictions of the Jack Rabbit II chlorine release experiments”, 10th Euro Chlor International Chlorine Technology Conference & Exhibition, Berlin, Germany, 16-18 May 2017
33. McKenna B et al (2016) “Dispersion model predictions of the Jack Rabbit II chlorine experiments using Drift and Phast”, IChemE Symposium Series No. 161, Hazards 26, <https://www.icheme.org/media/11815/hazards-26-poster-10-dispersion-model-predictions-of-the-jack-rabbit-ii-chlorine-experiments-using-drift-and-phast.pdf>
